

Licensing Requirements

An FCC license provides the user with the legal authorization to operate the MPRR on the licensed frequencies at the site specified in the license. Only an authorized installer or service technician can set the RF frequency of the MPRR to the frequency specified in the FCC site license. No end-user-operated controls exist on the MPRR.

The FCC license may provide the user with protection and authorization to maintain the system should any other RFID product be used in the licensed area after the MPRR equipment is installed.

Users of the MPRR in the United States must obtain a license from the FCC. In the United States, the authorized *modulated* (SeGo protocol operation) frequency band for this product is 911.75 to 919.75 MHz and the authorized *continuous wave* (AAR-formatted operation) frequency band is 902.25 to 903.75 MHz and 910.00 to 921.50 MHz.

The user is responsible for filing the FCC license according to FCC regulations, but the TransCore dealer will provide assistance and support as necessary to complete these forms. Forms are available online at the FCC internet site <http://wireless.fcc.gov/uls>. For further information on obtaining the license contact TransCore.

Caution

This equipment can be set to frequency ranges outside those authorized for use in the U.S. by the FCC. Users in all countries should check with the appropriate local authorities for licensing requirements.

Technical Support

Authorized dealers and distributors are responsible for the direct support of all customers. Authorized dealers and distributors needing technical support can contact:

Technical Support

Phone: (214) 461-6449
